Compton Creek Mosquito Abatement District

From: John Franklin, General Manager

Date: October 5, 2026

Re: General Manager's Report for October 2026

WEATHER

Temperatures at Noon:	High – 89	Low – 77	Ave. – 81
Days Clear – 15	Overcast – 0		
Service Requests – 5	Rain – 0		

OPERATIONAL REPORT

The District continued its spring surveillance program which included inspections for mosquito breeding throughout the month of September. District personnel continue to routinely inspect public areas, such as street gutters, catch basins, box drains, swimming pools, etc., for any evidence of mosquito breeding. The area(s) in which breeding was found were treated appropriately. Swimming pools that are not being properly maintained have been a top priority for CCMAD due to the number of cases of West Nile Virus.

MANAGER'S REPORT

Public Education

The District has continued its public awareness campaign to promote public safety through effective mosquito control and shared public responsibility. Social media platforms are being updated daily with information, stories, and best practices for protecting yourself from mosquitoes. District personnel are also in the neighborhoods daily, distributing mosquito awareness literature and promoting the District's message directly to residents.

MVCAC Southern Region Quarterly Meeting

On September 28, 2026, the Southern Region Members of the MVCAC met for the quarterly meeting. Multiple districts report positive West Nile Virus (WNV) cases with humans, birds and tested mosquito pools are higher than any previous mosquito breeding season in the last 5 years. California Department of Public Health reported that the state of California to date this year, human cases of (WNV) is at 252 and 1 case of St. Louis Encephalitis. Approximately 9,034 dead birds

have been reported, 2,060 have been tested, and 691 have tested positive for WNV. With the numbers reported. There is a heightened focus on community information and breeding prevention. CCMAD has intensified its focus on breeding sources to protect the community.

Mosquito BEACONS Invasive Mosquito Management Workshop

The district's General Manager attended the hosted by the Puerto Rico Vector Control Unit from September 30, 2026, to October 1, 2026. Mosquito BEACONS conducted the training for the workshop. The subjects and hands on training included:

- Home Inspection & Equipment Control
- Mosquito Surveillance
- Practical Integrated Mosquito Management
- Mosquito Sample Preservation – Pinning
- Larval Identification Basics
- Invasive Mosquito Species Identification & Bionomics
